Response to Notification of a Defective Response

Sir:

This is in response to the subject notice dated 18 June 2001 alleging the English translation of the International Application as originally filed to be defective because the number of claims in the International Application and the number of claims in the translation are not the same.

The allegation is not understood. The application to commence the U.S. national phase of the instant International Application was filed with an English translation (6 sheets) of the specification, six (6) claims and abstract of the international application as originally filed as well as with an English translation (5 sheets) of the amended specification and two (2) claims annexed to the International Preliminary Examination Report dated 22 January 2001.

The records of the undersigned attorney show the international application to have been originally filed with six claims.

Copies of the English translations of the two specifications and their

claims as filed on 20 April 2001 are submitted herewith.

Respectfully submitted,

Karl Hormann
